ABOUT US

关于我们

简源岩板是一家集岩板生产、加工到成品及销售为一体的企业，同时也是西班牙INALCO、TECHLAM、COVERLAM、ARGENTA、意大利ATLASPLAN岩板在中国区的授权市场运营商。

为了更好的服务于各行业，公司有着完善的全案落地机制，并配备国产岩板满足空间设计的多样化；先后与各大服装，美妆品牌，知名房地产等合作，优质的产品以及全面的服务等赢得一致认可，成功案例遍布全球。

janye slabs is an enterprise that integrates the production, processing, finished products, and sales of slabs, and is also a subsidiary of Spanish company authorization of INALCO, TECHLAM, COVERLAM, ARGENTA, and Italian ATLASPLAN slabs in China market operators.

In order to better serve various industries, the company has a comprehensive case implementation mechanism and is equipped with domestic slabs full space facilities diversification of plans; We have successively collaborated with various clothing, beauty brands, well-known real estate companies, etc., providing high-quality products and full service, We have won the recognition of our clients and have successful cases all over the world.

COMPANY ADVANTAGES

Fully reinforced

全线产品100%西班牙或意大利进口品质卓越款式，众多质感细腻丰富。配备1200x2700mm/1000x3000mm/1600X3200mm等常用尺寸，厚度有3mm/6mm/12mm等可满足所有空间使用需求。企业至今已拥有数十项国家专利，产品通过国际CB认证、欧洲CE、ROHS，大洋洲SAA及北美ETL认证，产品畅销国内外。

All products is 100% imported from Spain or Italy with excellent quality. There are many styles with exquisite and rich texture, which can meet all space usage needs. Prepare size 1200x2700mm/1000x3000mm/1600X3200mm and with a thickness of 3mm/6mm/20mm, which can meet all space requirements. The company has dozens of national patents, and its products have passed international CB certification, European CE, ROHS, Oceania SAA, and North American ETL certification, the products are best-selling both domestically and internationally.

Team system

拥有专业的岩板施工团队，完善的服务体系及精湛施工技术，齐全多类的施工服务确保岩板得到最佳的呈现及使用。完善的岩板加工工艺类型为客户提供多种成品呈现方式解决岩板高端应用的各类难题。

We have a professional slabs construction team, a complete service system and exquisite construction technology, and a complete range of construction services to ensure the best presentation and use of slabs. We provide customers with a variety of finished product presentation methods to solve various challenges in high-end applications of slabs through our comprehensive slabs processing technology.

Development product

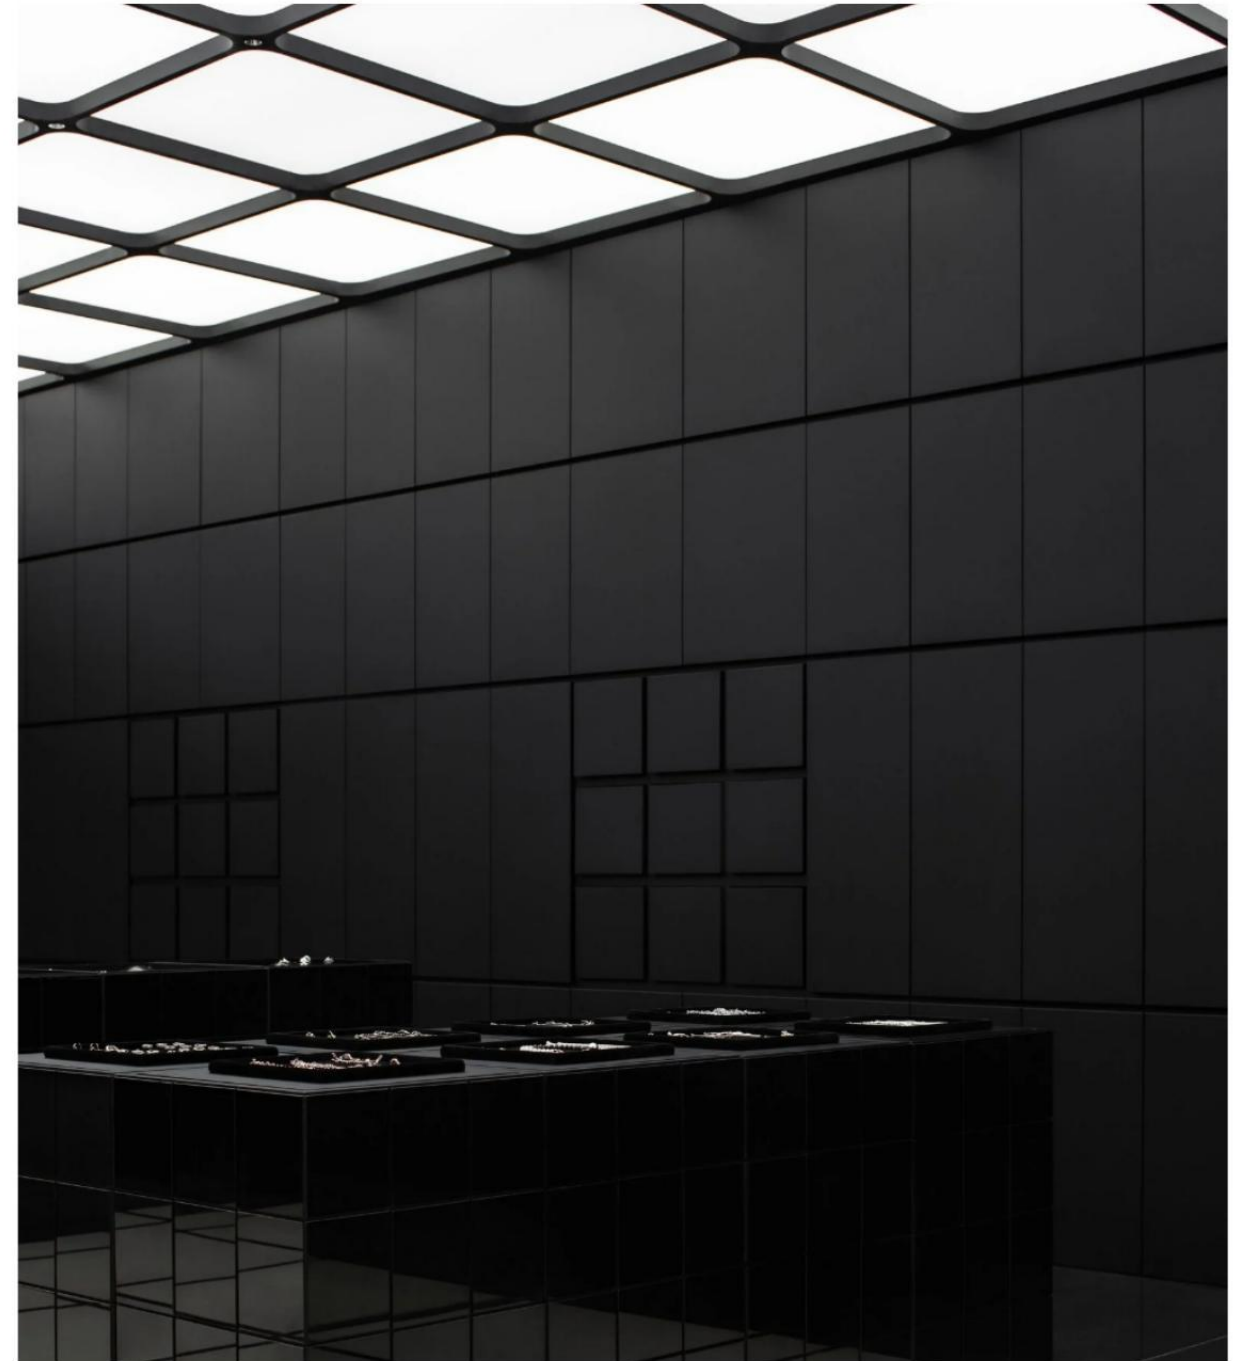

简源岩板致力于岩板开发与制造，自主研发多类岩板家居成品系列，岩板柜门板、岩板茶几、餐桌、卫浴柜、加热毛巾架、橱柜衣柜定制等，搭配品质岩板及优质的加工施工技术，为客户呈现高端卓越的岩板应用体系。

JANYE slabs committed to the development and manufacturing of slabs, we independently develop multiple types of slabs home products, including slabs cabinet door panels, slabs coffee tables, dining tables, bathroom cabinets, heated towel racks, and customized cabinets and wardrobes. With high-quality slabs and high-quality processing and construction technology, we present our customers with a high-end and excellent slabs application system.

Large reserves

国内库存面积达100000m²，各类岩板库存充足搭配完善的物流发货体系以最快速度让货物完整交付客户。

The domestic warehouse area reaches 100000 meters, with sufficient inventory of various types of slabs and a complete logistics delivery system to ensure the complete delivery of goods to customers at the fastest speed.

FACTORY INTRODUCTION

公司生产设施配备有国内外先进的陶瓷生产线，以及采用意大利西斯特姆21000吨无框压机压制、辊道窑、辊印机等各类生产设备，年生产能力近9000万平方米。

引入先进的意大利岩板生产工艺技术、生产线和设计理念，使其与世界潮流保持同步，从而在高端艺术定制岩板建筑材料及家居用品行业中确立了领先地位。

The company is equipped with advanced domestic and international ceramic production lines, along with a full range of production facilities including the Italian System 21,000-ton frameless press, roller kilns and roller printing machines, with an annual production capacity of nearly 90 million square meters.

We introduce cutting-edge Italian sintered stone production technologies, production lines and design concepts to keep pace with global trends. This has established our leading position in the industry of high-end custom artistic sintered stone building materials and home furnishing products.

创新皮带模具

专为岩板拉槽工艺深度定制，重塑
肌理美学与成型精度

Two Exclusive New Belt Molds

Brand-new
process technology
全新工艺技术

岩板经精细拉槽工艺精工雕琢，表面线条利落规整，层次立体分明。

通过深浅有序的槽纹肌理，复刻天然石材的自然质感，打造浓郁浮雕立体效果；光影游走于槽纹之间，明暗交错、质感高级。

Crafted with exquisite grooving technology, the sintered stone features neat and sleek surface lines with distinct three-dimensional layers.

With orderly grooved textures of varying depths, it replicates the natural texture of natural stone and delivers a strong embossed three-dimensional effect. Light and shadow flow along the grooves, presenting subtle light and shade contrast with an upscale textured appeal.

承袭天然板岩原生肌理特质，采用新型复刻成型工艺，高度还原天然板岩粗犷自然的质感与层次肌理。

纹理随性错落、深浅过渡自然，保留原石质朴哑光质感，触感温润细腻。

Inheriting the original texture characteristics of natural slate, it adopts an innovative replica forming technology, perfectly restoring the rugged natural texture and layered grain of natural slate.

The texture is naturally scattered with smooth gradient in depth, retaining the simple matte finish of raw stone and delivering a mild and delicate tactile feel.

SPOT SERIES

斑点系列

Spots are a unique material that not only embodies the wonders of nature and human wisdom, but also symbolizes steadfastness, persistence, and unshakable strength. It carries the storms of time and the ups and downs of life, and is the accumulation of time and life. Under the polishing of time, it is gradually eroded and smoothed out until its essential beauty is revealed. It is like a mirror, reflecting the sincerity and kindness of the human heart, and also like a sharp sword, piercing through the vanity and falsehood of the world. Reminder that we all gradually mature through the grinding of time, eventually grinding away the edges and becoming more rounded and smooth.

LIME STONE SERIES

莱姆石系列

Limestone is a crystalline stone formed by the accumulation of rocks, debris, shellfish, corals, and other alluvial materials under the seabed hundreds of millions of years ago through weather and crustal changes. Due to different sedimentation years and dramatic changes in geothermal and crustal pressure, it presents different hardness and softness. We call it Limestone. The composition of Limestone is composed of a large number of shell fossils of small shellfish animals from billions of years ago, Therefore, it is also known as the "Stone of Life"

TRAVERTINO SERIES

洞石系列

Cave stone, scientific name is limestone, English name: Travertine is a porous rock, so people usually call it cave stone. Cave stone is a porous rock that is commercially classified as marble. Dongshi belongs to sedimentary rocks and is a type of calcium carbonate sediment. Due to the occasional appearance of pores during the process of re accumulation, and the fact that its main component is calcium carbonate, it is easily dissolved and corroded by water, many natural irregular pores will appear in these accumulations.

SOLID COLOR SERIES

纯色系列

The Morandi series expresses a unique sense of color in an extremely simple way, seeking a peaceful and noble artistic balance. Create a soft and serene atmosphere in pure form, touch the temperature required by the human spiritual world, pursue the purity and elegance of spatial images, and give the space a delicate and elegant atmosphere.

WOOD SERIES

木纹系列

Wood, one of the most natural materials, is unique to every piece of wood. With its unique language, it tells its own story. We can understand its life from every crack, worm hole, scar knot, and texture in the wood. The most important thing about wood is its natural and simple characteristics, always giving people a feeling of returning to simplicity, and therefore it is loved by people. The natural color and clear texture of wood will make the home environment full of natural and harmonious tranquility.

Daily maintenance

Stain type	Detergent type	Instructions for use
Daily cleaning	Wax-free neutral cleaners, such as floor cleaners: Do not use alcohol, acid, solvent, corrosive cleaners, steel velvet, or scrub sponges.	According to the state of the floor, such as every 10 to 20 days, use a neutral cleaner diluted by a lot of hot water for cleaning, and then dry with a high-quality microfiber cloth, wash, rinse thoroughly with water, and then dry with another high-quality microfiber cloth.
Coffee flavor, cola, juice	Alkaline cleaners, such as color stain cleaners, bleach cleaners, etc.	Please follow the manufacturer's instructions
Grease, dust, deep cleaning	Alkaline cleaner	Please follow the manufacturer's instructions
wine	Oxidized cleaner	Please follow the manufacturer's instructions
Lime residue	Acid based cleaner	Please follow the manufacturer's instructions and test on the rock sheet before use,especially for polished products
rust	Acid based cleaner	Dilute the product and apply it directly to the stain. Wait for 10 to 20 minutes and rinse thoroughly. Repeat as many times as necessary to clean. Test on the rock sheet before use. Especially suitable for polishing products.
Tire marks, aluminum pen marks and metal marks	An abrasive, such as a polishing paste	Please follow the manufacturer's instructions and test on the rock sheet before use,especially for polished products
Ink, signature pen	Solvent-based cleaners, such as nitrocellulose thinner, liquor, color stain remover, etc.	Apply the undiluted solvent directly to the stain and wait 15 to 30 seconds. Repeat as many times as necessary to clean. Follow the manufacturer's instructions for "Color stain Remover".

Cleaning after installation

Residue type	Optimum cleaning time	Cleanser	Processing instructions
Cement-based grout is mixed with water	Clean within 4-5 days of grout to 10 days	Acid based cleaner	1. Please follow the instructions provided by the cleaner manufacturer. 2. Test on the rock plate before use, wet the surface with waterbeforecleaning; After cleaning, leave all residue Dry or clean with a wet vacuum cleaner, rinse thoroughly with water several times, and then blot the remaining rinse water with a wet vacuum cleaner or cloth.
Two component, reactive epoxy grouting	Proceed at once	Please follow the manufacturer's instructions	1. This kind of product must be removed immediately, because this kind of grout will harden quickly, and it is difficult to clean after hardening; 2. Strictly follow the cleaning method recommended by the manufacturer, and conduct a cleaning test before grout. Check to see if it works.

Matters needing attention

- 01.Do not clean when the temperature is too high, such as after exposure to the sun in hot summer, as the chemical erosion reaction may be more intense. Therefore, cleaning should be done during the coolest part of the day in summer:
02. If the surface of the rock plate has a special anti-skid, rough or structured texture design, it is more difficult to clean, and it needs to be cleaned as soon as possible, and use a cleaning machine equipped with white or beige cleaning pad to clean.

Technical performance

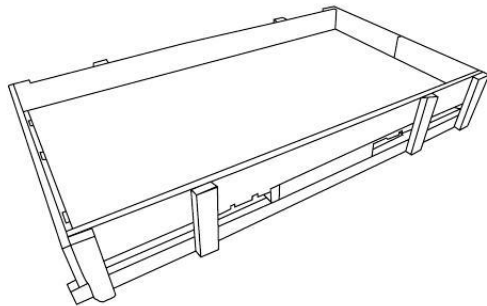

PHYSICAL-CHEMICALPROPERTIES		STANDARD OF TEST	REQUIRED VALUE		AVERAGE VALUE
 Sizes	/Length and width	ISO 10545.2	±0.3% max	±0.1%	conform
	/Lateral straightness		±0.3% max	±0.8%	conform

If cleaning is not done properly and contamination remains, the following countermeasures can be taken

Site protection

There will be other construction workers at the construction site, so it is particularly important to protect the face of the rock slab before it is installed and delivered to the customer. Paving personnel It is responsible to install appropriate materials to protect the rock slab. It is suggested that particle board can be laid on the ground and protective board can be laid on the wall to achieve good protection effect.

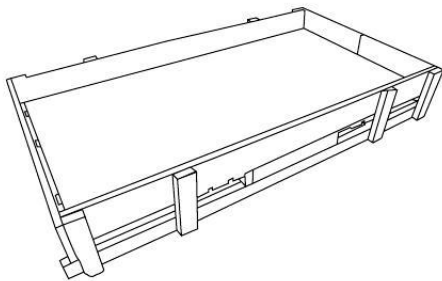

Packaging information

cm 292 x 145 x h35
cm 291 x 137 x h38

CASSA IN LEGNO PER FORMATO 120x280 ± 6mm
WOODEN CRATE FOR SIZE 120x280 - 48"x110" ± 6mm
CAISSE EN BOIS POUR FORMAT 120x280 ± 6mm
HOLZKISTE FUER DAS FORMAT 120x280 ± 6mm

MAX 20 PCS
KG 107

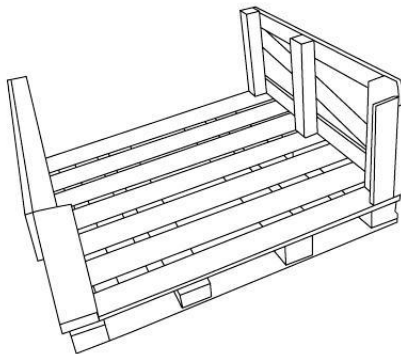

cm 292 x 145 x h25

CASSA "LIGHT" IN LEGNO PER FORMATO 120x280 ± 6mm
"LIGHT" WOODEN CRATE FOR SIZE 120x280 - 48"x110" ± 6mm
"LIGHT" CAISSE EN BOIS POUR FORMAT 120x280 ± 6mm
"LIGHT" HOLZKISTE FUER DAS FORMAT 120x280 ± 6mm

MAX 5 PCS
KG 95

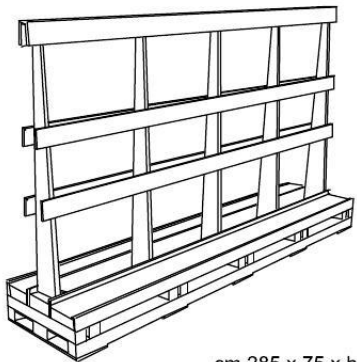

Disponibile solo su richiesta - Available on request only
Verfügbar nur auf Anfrage - Disponible uniquement sur demande

cm 292 x 145 x h35

CASSA IN LEGNO PER FORMATO 120x120 ± 6mm
WOODEN CRATE FOR SIZE 120x120 - 48"x48" ± 6mm
CAISSE EN BOIS POUR FORMAT 120x120 ± 6mm
HOLZKISTE FUER DAS FORMAT 120x120 ± 6mm

MAX 48 PCS
KG 48

cm 285 x 75 x h160

CAVALLETTO IN LEGNO PER FORMATO 120x280 ± 6mm
WOODEN A-FRAME FOR SIZE 120x280 - 48"x110" ± 6mm
CHEVALET EN BOIS POUR FORMAT 120x280 ± 6mm
HOLZGESTELL FUER DAS FORMAT 120x280 ± 6mm

MAX 44 PCS
KG 177

Disponibile solo su richiesta - Available on request only
Verfügbar nur auf Anfrage - Disponible uniquement sur demande

cm 290 x 75 x h146

CAVALLETTO IN METALLO PER FORMATO 120x280 ± 6mm
METAL A-FRAME FOR SIZE 120x280 - 48"x110" ± 6mm
CHEVALET EN METAL POUR FORMAT 120x280 ± 6mm
METALLGESTELL FUER DAS FORMAT 120x280 ± 6mm

MAX 44 PCS
KG 109

Disponibile solo su richiesta - Available on request only
Verfügbar nur auf Anfrage - Disponible uniquement sur demande

01. Wooden crate palletizing:

For two or more rock slabs containing the same or multiple module specifications, they must be placed in the same wooden crate until it is full. Place the wooden box with pearl cotton padding in the designated location, then use a robotic arm suction cup to move the rock slab into the wooden box, fill it with pearl cotton, cover it with a cover plate, fix the cover plate with nails, and finally fix it with zip ties. Special attention should be paid to the wooden crate being filled or filled with a protective layer.

02. A-frame support:

Place the rock slab inside the A-frame and secure it with straps and ties. The size of the rock slab should be similar to that of the A-frame, and smaller rock slabs should not be placed between larger ones. The ties should not be too tight to avoid breakage.
